MitiMeth Internships

ABOUT MITIMETH

MitiMeth is an award-winning Social Enterprise based in Nigeria. Our vision is to create environmentally and economically thriving handicraft producing communities and to become Nigeria's #1 choice in eco-friendly handcrafted products. We are creating livelihoods via the Creative Economy and have connected the Art-Crafts-Design sub-sector to socio-economic development through the transformation of environmental menaces and agricultural residues such as invasive water hyacinth, typha grass, banana bark, coconut shells and bamboo colms. From these natural fibers, we design and produce unique home accent furniture, stationery, baskets, gifts, fashion accessories, dining-ware and rope. We facilitate Craft Innovation Workshops in rural communities empowering women and youth to create income earning opportunities utilizing these locally available resources. In partnership with its private and public sector partners, MitiMeth has trained over 400 women, farmers and youth from 25 communities in both Nigeria and Ghana. MitiMeth has enabled livelihoods for 80 artisans (mostly women) through training and regular orders for handcrafted products.

NUTS AND BOLTS

Our Interns are largely comprised of independent students or recent graduates and the environment is dynamic and highly energized. We offer remote location Internships as well as on-site Internships. The remote location Internships are mainly Social Media Internships and Research Internships. On-site Internships offer the same opportunities and more. The preferred duration of the Internship is 9 – 12 weeks. Students receive significant executive direction and guidance, including career advice, if requested.

MitiMeth is constantly innovating products and ALL Interns will spend some time assisting and contributing to the co-creation project.

All interested applicants should send a cover letter and resume to their department of interest with the subject line “Internship Application”:

Email: mitimeth@gmail.com

SOCIAL MEDIA INTERNSHIP

We focus on consumer engagement to promote natural fibre and agricultural residue transformation and community enterprise development efforts, connect with our fan base, and spread awareness of the company mission. Interns are involved in content creation, drafting and managing social media messages, e-blast communication, analyzing social media performance reports and much more.

EXECUTIVE TEAM INTERNSHIP

The Executive Team Interns help create client-specific presentations to potential new partners. Interns will lead research projects and explore strategic initiatives with Senior Management that may be implemented within Nigeria and beyond, including corporate and community engagement initiatives, analysis of potential partners and competitors, and CEO-driven projects.

BRAND MANAGEMENT / MARKETING INTERNSHIP

Brand Management Interns drive program growth by researching industry topics and trade statistics, compiling creative ideas, planning social media strategies, creating email marketing campaigns, identifying retail channel partners and retail promotions, and product collections.

RESEARCH AND DEVELOPMENT INTERNSHIP

Various natural fibre materials are utilized by MitiMeth. Interns will conduct research on different items to determine their composition and the various processes needed to add value to the fibres. Interns will identify target applications and audiences for the water hyacinth and agricultural residue fibres. Interns will work closely with the R&D team, all while learning about various fibres and the transformation techniques used in industry. Areas of education for the Interns include natural fibre processing, packaging design, materials properties, and general sustainability.

Fields of Study that should apply: Material Science, Chemistry, Engineering, Textiles or related fields

A unique choice in handcrafted accessories

DESIGN INTERNSHIP

MitiMeth Interns use water hyacinth and agricultural residues to produce interiors and fashion accessories, using tools that range from sewing machines to power tools and everything in between. Ideal candidates are sustainability-minded and aren't afraid to get their hands dirty.

OPERATIONS & LOGISTICS INTERNSHIP

Interns will help the Operations team efforts with inventory and warehouse management, pricing and cost analysis.

All interested applicants should send a cover letter and resume to mitimeth@gmail.com with the subject line “Internship Application”
